Plaque Presentation Ceremony for the Project for Improving Maternal and Neonatal Health Care in Guatemala through the Utilization of Medical Technologies

On June 18, 2019, the plaque presentation ceremony for the Project for Improving Maternal and Neonatal Health Care in Guatemala through the Utilization of Medical Technologies was held at 10:00 am at the 1st Conference Room of the National Taiwan University Children's Hospital (NTUCH).

For this project, the Embassy of the Republic of China (Taiwan) in Guatemala invited the International Cooperation and Development Fund (TaiwanICDF) to work alongside NTUH as an appointed partner, with the aim of developing maternity and neonatal projects that align with Guatemalan medical and healthcare policies and the focal points of international organizations with regard to development assistance. The project mainly aims to develop the capabilities of the primary medical and healthcare staff in Guatemala, enhance the capabilities of Guatemala's primary medical units, and assist the country to improve its quality of newborn care.

The signing ceremony for the project action plan was held on June 4, 2019 by the Embassy of the Republic of China (Taiwan) in Guatemala and the Ministry of Public Health and Social Assistance of Guatemala. During the ceremony, a plaque was presented by Timothy T. Y. Hsiang, secretary general of TaiwanICDF, to NTUH, marking the official commencement of the 3-year project and cooperation between both parties.
Prof. Shyr-Chyr Chen, the interim superintendent of NTUH, and Prof. Mei-Hwan Wu, the superintendent of NTUCH, accept the plaque from Timothy T. Y. Hsiang, secretary general of TaiwanICDF.
